DIRECTIONS:

To light: Use a match to light the edge of the FireOn Fuel Disk. (In windy conditions, try breaking off a piece of the fuel disk and lighting it on top of the remaining fuel disk.)

To Extinguish: Smother the FireOn Fuel Disk to remove its source of oxygen.

To Re-light: Place a match on top of the previously burned area.

(Tip: To get the most out of your FireOn Disk, you can break it in half and save half for later use.)

WARNING: Carbon monoxide and fire hazard. Use only in well ventilated areas. These fuel disks consume oxygen and produce carbon monoxide gas, which is poisonous and has no odor. Do not use in an enclosed space such as inside a home, camper, tent, or car.
